

Please allow XMradio to continue to provide me with better programming than available on regular radio. The owners of these stations need to offer better programs and better traffic & weather(although no one can forecast the weather any good). This is about to become another example of big business buying the elected officials to block new & innovative ideas that better the lives of Americans & hit the wallet of these big businesses! I urge congress to vote NO,NO,NO to HR 4026.
